SCHOOL FINANCE MEMORANDUM 99-072

TO: Delrep Users
FROM: John Eickman
DATE: 05/06/99
SUBJECT: Delrep Version 2.1 Update

We would like to thank you in advance for using the Delrep program to report your data to us electronically. We hope you have found Delrep to be a functional, accurate and easy to use program.

We are sending this memo to inform you about Delrep 2.1. If you are currently using Delrep 2.0 you will be able, starting May 11, to download an update file from our Web site <http://www.ade.state.az.us/schoolfinance/main/support> and upgrade from 2.0 to 2.1. If you currently do not have 2.0 on your machine, you will download the complete version of Delrep 2.1. If you do not have an Internet connection, and would like to request Delrep 2.1 please fill out the enclosed form.

Delrep 2.1 includes three additional systems, not available on Delrep2.0 released in the fall of 1998, Transportation Route Report, Vehicles Inventory, and upgraded Year-end Enrollment. We have also added a new utilities feature, Import Tables, for those of you who use the SDER and Vehicle Inventory systems. You can now load your preliminary report table from a diskette into Delrep, without copying over your other system tables. **Enhancements have been made to ensure year 2000 compliance; for this reason, you are strongly encouraged to upgrade your current version of Delrep to Delrep 2.1.**

The Regional Training Centers (RTC) will be holding training sessions for Delrep sometime in May. For those of you who are interested, please check their Web site <http://ade.ed.asu.edu/rtc> or call your local RTC for further details.
